

Realizing HCM Optimization

Knowing where and when you will get the best return on your talent investment is critical for increasing competitiveness. Infor Human Capital Management enterprise applications allow HR to deliver strategic business outcomes and develop a more productive workforce by improving employee engagement and performance, quality of hire, and talent mobility.

Avaap can help you develop your HCM technology roadmap to realize HCM optimization from Infor Lawson and Global HR core business processes to Talent Management, Workforce Management, HR Services Delivery, Learning Management and Talent Sciences. Avaap's outcome-driven methodology and proprietary tools for expediting common, repetitive tasks during the project cycle drive implementation success and faster time to value.

Our deep industry expertise for leveraging application functionality and adaptive training strategies accelerate adoption for improved HR service delivery and business processes. Talk to Avaap and learn how we can help you get you started on the journey to HCM optimization in the fastest, most predictable and reliable manner possible.

Value Through Infor Expertise:

- **Deep integrations for connecting talent and business performance data**
- **Flexibility to choose the tools that maximize impact now and add later as needs change**
- **Options to deploy and integrate cloud and on premise solutions to match your technology strategy**
- **JumpStart solutions to reduce installation hours and associated costs**
- **Faster time to value of your Infor investment**
