

FASTER, SMOOTHER INFOR IMPLEMENTATION

Accessories are Necessities.

With Avaap, simple additions mean dramatic differences

Accessories do more than complete your look. They create opportunity to make the best better. Implementation accelerators are like that — simple additions that make a dramatic difference.

Avaap accelerators for Infor Implementations, including Jumpstart Framework, Avaap M3 API Engine and Avaap Test Automation for Infor M3, are designed to drive efficiency and streamline processes for a faster, smoother Infor implementation. Getting up on the latest technology helps fashion organizations meet changing business demands, engage consumers and get them to return. Discover smart accessories to accelerate your upgrade and get faster time to value on your Infor investment.

Choosing Avaap as your implementation partner? Accessories are included! Learn more at www.avaap.com.
