

Infor CloudSuite Financials Service Delivery

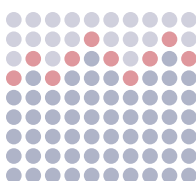

Infor CloudSuite Financials is shattering the traditional approach to financial management with a brand new application built for the cloud. Infor CloudSuite Financials integrates multiple functions traditionally requiring disparate systems into a single suite, including core financial management, treasury applications, close & reconciliation management, business intelligence, and treasury & cash management. The result: a consolidated view of the truth, fewer systems and resources to manage, lower maintenance requirements and reduced infrastructure complexity.

Through strategic hires, boot camp training, and certified Infor courses, Avaap consultants are prepared to help customers navigate a successful Infor CloudSuite Financials implementation and leverage next-generation financial management capabilities to drive transformation.

Key Service Features

- 💰 *A single suite with no duplication of data*
- 💰 *Consumer-grade UX for business users*
- 💰 *Rich functionality with new capabilities in the areas of social business, mobility, analytics, and integration*
