Streamline Installations

*“Avaap Security Dashboard is a turnkey solution and exactly what we were looking for, saving us the agony of learning multiple technologies for some simple reporting capabilities. We were thrilled with the end result as it not only helped meet our audit guidelines, but also manage our security data more efficiently”.*

Avaap Security Dashboard simplifies Lawson security and compliance reporting making it easier to monitor security role permissions, detect access violations, and satisfy audit requirements. The turnkey solution immediately helps organizations achieve greater visibility into Lawson security data to quickly identify and resolve Lawson security-related issues and improve IT business processes.
