COVID-19 ONE STATE'S FIGHT AGAINST CORONAVIRUS USING TECHNOLOGY

Learn more about how the Avaap BI team is partnering in real time with the State of Ohio to fight against the Covid-19 pandemic using state of the art technology.

WHAT WE ARE DOING

1. DATA MANAGEMENT
   Govern your analytics environment to move forward with confidence
   ✓ Get ahead of questions with a complete data view.
   ✓ Make decisions with fresh information.
   ✓ Have trust in your data.

2. DATA VISUALIZATION AND DECISION SUPPORT
   Enhance data processing and organization efficiency
   ✓ Model and compare impacts via a dedicated UI.
   ✓ Understand your data sources.
   ✓ Ask better questions.

3. PLANNING FOR RESILIENCY
   Guide better response following a crisis
   ✓ Better address increased healthcare demands.
   ✓ Analyze complex data and predict relationships to create data-driven solutions.
   ✓ Support efforts to innovate and ensure local infrastructures remain robust.

Ohio Health Director Dr. Amy Acton unveiled a statewide dashboard for COVID-19 data. The dashboard makes available county-level and demographic data. It was assembled by Avaap in conjunction with a team of analysts in the state health department, whom Acton affectionately calls “The Force.”

Success at the State of Ohio
The Office of Ohio Governor Mike DeWine and the Ohio Department of Health Covid-19 Task Force is working with Avaap to develop increased transparency to citizens, using data to show if social distancing, raised awareness for proper hand-washing, travel restrictions, and other measures are buying more time for the state health systems as they prepare for potential waves and surges of the disease — and that they’re ready when the surge hits.

We have created a new interactive feature on coronavirus.ohio.gov. We are trying to be as transparent as possible. You can see more about county-level demographics.
